

SAJIN JOSEPH

Cybersecurity Engineer (Network & Infrastructure)

KERALA, INDIA • +917994247021 • sajinjoseph363@gmail.com

<https://www.linkedin.com/in/sajin-joseph-9471a9254/>

PROFESSIONAL SUMMARY

I am a highly motivated cybersecurity professional with up to three years of hands-on experience, committed to continuous learning and strengthening organizational security frameworks. With strong communication skills across technical and non-technical stakeholders, I effectively apply cybersecurity best practices to enhance security posture and safeguard critical digital assets.

TECHNICAL SKILLS / TOOLS

Network & Infrastructure Security:

Securing network and infrastructure, Network segmentation, Vulnerability Management, and Continuous monitoring, Security implementations.

Firewall & Perimeter Security: FortiGate, Sophos, Check Point, Palo Alto

Data Protection:

IBM Guardium (GDP, GDE), Veeam Backup, DLP Forcepoint

Email & Web Security:

Trend Micro, Sophos, Check Point EmailSec, Netskope Proxy

Server & Virtualization:

HPE ProLiant Servers, VMware ESXi, vSphere Client, Proxmox Systems

Directory & Identity Management: Windows AD, Azure Entra ID, Cisco ISE (NAC)

Cloud & Productivity Platforms: : Microsoft 365 Administration

Web Application Firewall (WAF): Cloudflare, Imperva (basic level)

Endpoint Security & EDR/XDR:

CrowdStrike, Sophos, Trend Micro, Carbon Black

Operating Systems:

Windows, Linux (Kali, Ubuntu)

MDM & Device Management:

SureMDM by 42Gears

SIEM & IDS/IPS:

Wazuh, Network Intrusion Detection/Prevention

Switching & Networking:

Aruba, Core Network troubleshooting

Vulnerability Assessment & Penetration Testing

Qualys, Nessus, Nmap, Burp Suite, Wireshark

Hands-on Cyber Labs:

Capture the Flag (CTF), TryHackMe, Hack The Box

Team Management:

First point of contact for the security Intern team

WORK HISTORY

SECURITY ANALYST- UPSMART SOLUTIONS INDIA PVT LTD

Present

- Acted as the first point of contact for the security team, coordinating daily SOC activities and ensuring smooth task execution.
- Managed and mentored interns and junior team members, providing hands-on training in security operations, tools, and best practices.
- Assigned daily and weekly security tasks, monitored progress, and reviewed deliverables to ensure quality and adherence to timelines.

- Monitored and analyzed security alerts from SIEM, EDR, and email security solutions to identify potential threats and incidents.
- Investigated security incidents including malware infections, phishing attacks, and suspicious network activity; performed root cause analysis and documented findings.
- Supported incident response activities such as containment, remediation, and recovery in alignment with organizational security procedures.
- Assisted in vulnerability assessments and coordinated remediation with IT and infrastructure teams.
- Collaborated with cross-functional teams to reduce false positives and improve detection and response capabilities.
- Prepared incident reports, dashboards, and security documentation for internal and management review.
- Prepared Policy documentation required for all industries.
- Continuously tracked emerging threats and attack techniques to improve defensive strategies.

NETWORK SECURITY ENGINEER - GKS INFOTECH PVT LTD

SEPT 2024

- Led implementation of email security solutions, (Sophos, Check Point) across multiple domains, focusing on inbound protection and ZTNA-based access control.
- Deployed and managed firewall appliances including FortiGate, Sophos XG, Check Point, and Palo Alto for perimeter defense and traffic control.
- Administered endpoint security tools like CrowdStrike, Sophos EDR/XDR/MDR, and for malware prevention, behavioral analysis, and centralized threat response.
- Conducted regular vulnerability assessments using Qualys, Nessus, and Nmap; assisted in remediation tracking and patching coordination.
- Supported SIEM deployment using Wazuh, configured log sources and alerts for real-time threat monitoring.
- Managed Active Directory and Azure Entra ID Sync; configured SSO policies and ensured secure identity lifecycle management.
- Configured and maintained SureMDM (42Gears) for mobile device and remote endpoint policy enforcement.
- Oversaw backup and disaster recovery using Veeam Backup, ensuring business continuity for on-prem servers.
- Maintained and monitored Linux (Ubuntu, Kali) and Windows Server environments including hardening, patching, and logging.
- Facilitated NAS storage management and VMware ESXi/Proxmox-based server virtualization for internal and client-hosted services.
- Worked with Cisco ISE NAC and Aruba switching for network access control and segmentation. •Collaborated in security awareness programs
- Deployed and enforced Safetica DLP policies to monitor and prevent data exfiltration across endpoints and network shares.

SECURITY ANALYST – CYBERLEAP INDIA PVT LTD

DEC 2023 – SEPT 2024

- Threat Detection and Analysis: Proactively identify and analyze potential security threats within the endpoints using advanced tools. (CrowdStrike, Carbon Black, Trend Micro, Sentinel One)
- Deployed and managed IBM-Data Protection & Encryption tool (DAM, THALES) to monitor database activities and provide more security to Database servers.
- Managed firewall configurations and monitored network traffic to prevent unauthorized access and data breaches.
- Enforced network access policies using NAC solutions to ensure secure device access.
- Vulnerability Assessment: Conduct regular vulnerability assessments on endpoints, identifying weaknesses, and recommending remediation strategies
- Documentation and Knowledge Sharing: Maintain up-to-date
- Documentation on security procedures, incidents, and lessons learned, facilitating knowledge sharing across the team.

PROJECTS:

- **Penetration Testing Lab (Kali Linux & Metasploitable)**
Designed and maintained a controlled penetration testing lab using Kali Linux and Metasploitable to simulate real-world attack scenarios, including phishing, spoofing, privilege escalation, and social engineering techniques. Used the lab to understand attacker behavior and improve defensive controls.
- **Malware Development & Analysis Lab**
Developed and tested custom malware samples in a sandboxed environment using Havoc C2, implementing encryption techniques and basic EDR evasion methods. Performed static and dynamic malware analysis using tools such as PE-bear and custom C code to simulate advanced persistent threat (APT) behavior.
- **Security Monitoring & Infrastructure Defense Lab (Wazuh & EVE-NG)**
Built a comprehensive home security monitoring lab using Wazuh SIEM for real-time log collection, correlation, and alerting. Deployed the environment on Proxmox and VMware ESXi, and integrated EVE-NG to emulate enterprise-grade network infrastructure, firewall configurations, and intrusion detection scenarios.
- **Network & Infrastructure Security Implementation for Critical Environments**
Implemented and monitored network and infrastructure security controls for client-like environments resembling critical sectors such as banking, insurance, and industrial networks. Activities included firewall rule hardening, network segmentation, secure access controls, log monitoring, and continuous threat detection to ensure high availability and compliance.
- **AI-Enhanced SIEM Integration (Wazuh)**
Integrated AI-based detection techniques with Wazuh SIEM to enhance threat analysis, anomaly detection, and alert prioritization. Leveraged machine learning concepts for identifying abnormal patterns in logs and network traffic, reducing false positives and improving incident response efficiency.

EDUCATION

BCA- Bachelor Of Computer Application MC Varghese college of arts & science	2016 - 2019
Higher Secondary Education – Class XII (CBSE) Angels Arc Senior Secondary School	2016

ADDITIONAL INFORMATION

Certifications:

CEH-EC-Council Certified Ethical Hacker V12	Qualys VMDR, CSAM, WAS
CND-EC-Council Certified Network Defender-Ongoing	Google Cybersecurity
IAM Cloud sec by greatlearnings	
SOPHOS-Certified Architect Firewall & Endpoint Security	Azure Fundamentals
Checkpoint Quantum Spark Technical Specialist	CrowdStrike Admin -Udemy
Getting started with Sentinel One	Forti Analayzer 7.4 Administrator
AWS Certified Cloud Practitioner	

Acknowledgement:
I acknowledge the guidance, support, and knowledge shared by mentors, colleagues, and organizations that contributed to the development of my technical skills and professional growth.
